

Illanes Guillermo

I am a dedicated student currently pursuing a Software Development Technician degree at the Cervantes Institute, located in San Juan, Argentina. My studies are focused on a distance learning modality. I completed a Fullstack Bootcamp that enhanced my technical skills and ability to contribute to financial application development projects.

EXPERIENCE

2023 - 2024

DEVELOPMENT OF BANKING SOLUTIONS AT ITBA

- + Actively participated in the development of a digital banking system, focusing on remote work. Collaborated in a team to tackle technical and implementation challenges, ensuring the project met quality requirements and deadlines. This process enhanced my skills in task coordination and problem-solving in a team environment..
- + **Frontend Development:** I learned to create visually appealing and functional user interfaces using technologies like HTML, CSS, and JavaScript. Improved my skills in responsive design and crafting intuitive user experiences.
- + **Backend Development:** Backend Development: I explored the complexities of server-side logic and database management using Python, with a focus on SQLite. I gained experience in structuring and optimizing APIs for robust web applications, integrating external services, and implementing secure practices to protect sensitive data in a banking environment.

2023 - 2024

DEVELOPMENT OF EDUCATIONAL PLATFORM AT INSCO

- + **Insko :** I developed an educational system for a client, including student database management and virtual classroom creation, using PHP, MySQL, Bootstrap, JavaScript, and Moodle. Collaborated with a team to integrate system functionalities, enhancing my skills in teamwork and communication within a joint development setting.

EDUCATION

2009 - 2020

STUDIES COMPLETED - Escuela Nueva Juan Fanzolato
+ High School Diploma in Social Sciences and Humanities

2023 - 2025

STUDIES IN PROGRESS - Instituto Cervantes (ongoing)
+ Technical Degree in Software Development
